Implementation of EU regulations relating to embargoes and sanctions

Dear Sir or Madam,

with regard to the embargoes and sanctions against Russia issued by the European Union and partner countries (e.g. United Kingdom, United States of America) in this case Regulation (EU) 833/2014 (as well as United Kingdom Russia sanctions | GOV.UK, United States Ukraine/Russia sanctions | U. S. DoT-OFAC), import bans on sanctioned goods have entered into force (or will enter into force after transition periods), prohibiting the direct or indirect purchase, import or transfer into the territory of the European Union and its partner countries.

For the European Union and its partner countries, there is basically a ban on imports of:

- Sanctioned goods of Russian origin (Country of Origin),
- Sanctioned goods exported from Russia (this concerns the territory of the Russian Federation and the annexed Ukrainian regions of Kherson, Donetsk, Luhansk and Zaporizhzhya),
- In addition, import bans exist for the European Union and the United Kingdom with respect to goods processed in a third country using sanctioned iron and steel products from Russia.

We, as a supplier located in Europe, hereby confirm that for all of our business transactions we comply with the above applicable laws and regulations of the European Union, the United Kingdom and the United States.
